Authentication and Cloud Messaging
CI/CD using GitHub Actions and
Codemagic
Native development for Android using
Kotlin and iOS using Swift

Goals

I'm looking for a Flutter developer position.
I want to work on nice projects with other
skilled developers, to share my experience
and learn with them while building
gorgeous apps.

Work Experience

Specialist Software Developer

Compass.uol
April 2022 - December 2022

Responsible for maintain and improve
Ancar's apps for giant malls in several
places in Brazil. Working on refactoring the
app architecture, following SOLID
principles, aiming to keep the project
cleaner, decoupled and scalable as possible.
Futhermore, I was responsible for fixing
critical bugs in an internal app for São
Salvador Alimentos, and to perform some
improvements.

Software Engineer (Mid level)

Code Tecnologia
February 2021 - April 2022

Responsible for creating and maintaining
multiple apps in Flutter, ensuring good
code and best practices. At this company, I
established a standard for the apps,
creating a modular, scalable and testable
architecture. With this architecture, we
could share some modules across all apps
(e.g.: authentication). I also created an
entire design system to be used
everywhere.

Software Engineer (Junior)

MusicPlayce
July 2020 - January 2021

Responsible for maintaining the
MusicPlayce app (which uses Flutter),
posteriorly starting the refactoring process,
in order to implement the best
development practices.
